

Remote POS4000/V2

for use with the Wash Select II™

- Increase revenues by issuing unique car wash codes at multiple locations, such as lube shops or gas stations
- No distance restrictions
- No Internet connection, cables or antennas needed
- A system with remote codes can accommodate up to four (4) POS4000* consoles installed at a single site or multiple sites
- Multi-bay applications

The flexible Remote POS4000 Option offers the ability to connect up to four (4) POS4000* consoles to a Wash Select II car wash site. This option, which uses encrypted codes, is less costly than running hard cable, can be used where hard cable installations are not feasible and has no distance restrictions. The Remote POS4000 Option is sold as an add-on option to the POS4000/V2 consoles and can be installed as a field retrofit on established POS4000 units.

Requirements:

- Each POS4000 must have the Remote POS4000 option
- Each Wash Select II must be running software version 5.50 or higher
- Multi-bay applications require the multi-link fleet option in each Wash Select II
- Any POS4000 used in a C-Store with 'pay at the pump' functionality must have a POS register that supports a 6 or 7 digit code length*

* POS registers with a 6 digit code length support up to three POS consoles; registers with a 7 digit code length support up to four POS consoles

Version UE032009
