

# Lane Control System

## Express Exterior Market

**Unitec Electronics** is pleased to offer the Lane Control System for the Self-Pay Express Exterior Market. The system, which couples a Sentinel payment system and a gate barrier, offers consistent sales messages, decreases labor costs and manages gate openings for accurate line-up of vehicles at the wash.

*Sentinel shown with ReachFree ID and Lane Control System gate barriers*

### **Customer Convenience**

The Sentinel offers a large, 15-inch touchscreen technology and user-friendly screens designed to quickly guide customers through the transaction process while providing consistent sales messages. Multiple payment and change options are offered. The Sentinel's high change capacity limits down-time required to restock change.

### **Marketing & Reporting**

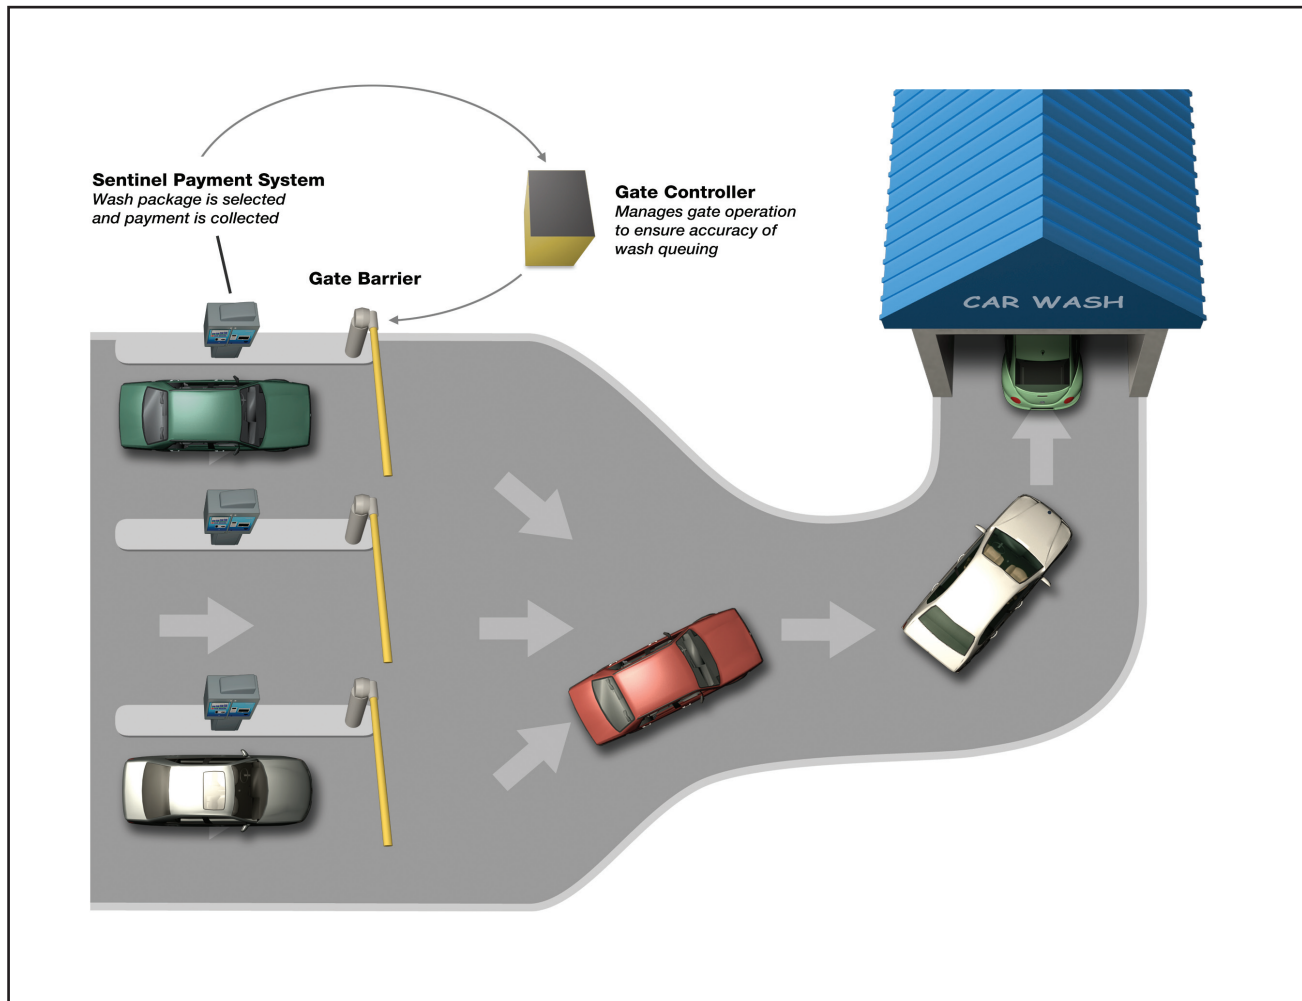

The Sentinel comes standard with customizable discount programs, post-sale advertisements, and VIP Wash Coupons. Optional is Sentinel's Enhanced Marketing Package which gives you access to 100,000+ house accounts, VIP Wash Pass cards and multi-site gift cards. Sentinel offers remote access via the Internet to monitor wash activity, generate detailed revenue reports and cash control.

### **Speed & Volume with RFID**

The ReachFree ID subscription-based account system offers an additional opportunity to increase wash volume and throughput. By utilizing an RFID tag, the system quickly approves the vehicle and puts it in the queue. Please note that the Enhanced Marketing Package is required to utilize RFID on the Sentinel.
