

Givex® Prepaid Cards

- Real-time transaction processing with the POS System
- Detailed and summarized reports by all sites and individual sites
- Also available for the Canadian market

Promote multiple carwash sites by rewarding customers with a multi-site prepaid card program

Unitec Electronics offers a program for gift card management. With the Givex® program, site owners can activate or add value to their cards from a Givex terminal or by dialing into the Givex telephone transaction line. Customers may redeem their cards at the carwash entrance with any Unitec Enterlink*, Wash Select II or Wash Select II POS equipped with the Givex option, dial-up credit card option, dedicated phone line, and receipt printer.

Site owners may manage their Givex accounts at the Givex management website and perform the following operations:

- Activate and add an initial value to an individual or multiple accounts
- Pull balance and history for an individual account
- Add value or a charge to an individual account
- Cancel a transaction
- Print, view, or email reports for usage.

*Please note that the Enterlink is no longer available as a factory-built unit.

Please call Unitec Electronics, or visit www.givex.com for more information.
