Sample Express Package Card

Introducing **Multi-Site Customer Cards**, a gift card option offered through Mercury Payment Systems to generate additional revenue and build customer loyalty. Mercury's 'Gift on Demand' option allows merchants to sell gift cards from their website and provides online recharge capabilities for gift card holders.

Mercury's gift cards are offered in Express or Custom packages. The Express program offers 500 cards in the standard design shown above with your car wash name and logo in black ink. Mercury will work with site owners who choose the Custom artwork package (minimum of 1,000 cards) for a car wash-specific, custom design.

Merchants may activate, de-activate and reload cards through a stand-alone terminal (offered in Internet or dial-up versions) and/or through a free back-office PC program. Both systems also process credit card sales for the purchase of the gift cards.
