Artwork CD Images

The enclosed Artwork CD contains sample campaigns that can be used to create collateral and advertising pieces. They can be used as they are or any part of the files can be changed or pulled from one file to another to create a custom look for your site. This CD contains unflattened Adobe PhotoShop files (PC and Mac platform). The artwork was created for use by graphic designers, production artists, printers, sign makers or anyone who uses Adobe PhotoShop or programs that import Adobe PhotoShop files to prepare final digital files for printing and publishing.
